

Line FIRE

Mobile boiler – Hot box

**FIRE****FIRE BIG**

TECHNICAL DESCRIPTION

The hot box – mobile boiler FIRE has been created to have hot water continuously in low and high pressure for the most different needs.

For example it can be connected to a professional cold water high pressure cleaner and immediately obtain hot water in high pressure from 30 to 200 bars.

Besides it can be used as a hot water generator just connecting to the normal water main (minimum 2 bars) and the temperature can be adjusted by means of the thermostat.

Model	Pressure	Water delivery	Temperature	Voltage
FIRE	30-200 BAR	300 – 900 lt/h	30° - 100° C	230V – 250W
FIRE BIG	30-200 BAR	300 - 1260 lt/h	30° - 100° C	230V – 250W

TECHNICAL FEATURES – Range FIRE

- Boiler model C2 (FIRE) or C3 (FIRE BIG), the same boilers used for our range URANO/ORION
- Fuel tank of lt. 30 (FIRE) or 36 (FIRE BIG) in stainless steel
- Flow switch
- On 4 wheels
- Structure in stainless steel AISI 430
- High pressure hose 2 mt. with fittings to connect the 2 machines (FIRE + cold water machine)
- It works from 30 to 200 bars with water delivery from 300 to 900 lt/h
- Temperature from 30° to 100°C
- Voltage 230V – single-phase
